## Carbon Fiber Cards & Glass Fiber Cards

Be Unique

## Carbon Fiber/Glass Fiber Guide

If you are looking for an alternative to traditional business cards or member cards, consider switching to a card made of carbon fiber.

Pure Metal Cards provides premium quality carbon fiber and glass fiber business cards or membership cards in either a gloss or matte finish.

Cards are available in 0.3mm (0.0118") or 0.6mm (0.0236") card thicknesses.

Our images only show part of the unique qualities these cards possess. As you move the card in the light, the fibers in the fiber yarn show a unique 3D depth, which is only present with real carbon fiber. There are thousands of individual carbon fibers woven into the yarn used to make the layers of material in these cards. Being carbon fiber, these cards take a lot of labor to manufacture.

In addition, we add your design on to the card and then apply individual layers of lacquer in a gloss or matte finish to seal each card for durability. The materials used and time taken to make each card are the reasons why these cards are more expensive.

## Carbon Fiber/Glass Fiber Guide

Description	Detail	ID
Carbon Fiber (gloss)	3K Twill carbon fiber	F600
		
Carbon Fiber (matte)	3K Twill carbon fiber	F600
		
Carbon Fiber/Red	3K Twill Red carbon fiber	F601
		
Carbon Fiber/Blue	3K Twill Blue carbon fiber	F602
		
Carbon Fiber/ Yellow	3K Twill Yellow carbon fiber	F603
		

## Carbon Fiber/Glass Fiber Guide

Description	Detail	ID
Carbon Fiber/ Gold line	3K Plain Gold line carbon fiber	F604
		
Carbon Fiber/ Silver line	3K Plain Silver line carbon fiber	F605
